

A GOOD MOVE

Is the Attempt to be Made by Weather Observer Schnepf

TO HAVE A WEATHER STATION

AND OBSERVATORY LOCATED IN WHEELING—THE OBSERVER LEFT EARLY THIS MORNING FOR WASHINGTON, WHERE HE WILL LAY THE MATTER BEFORE THE PROPER OFFICIALS. MR. REYMAN'S GENEROUS OFFER OF A SITE.

Early this morning, Mr. Christian Schnepf, the local representative of the United States weather bureau, left for Washington City. In addition to transacting private business Mr. Schnepf will approach Prof. Willis Moore, the chief signal officer, in charge of the weather service, in regard to a matter that is of considerable interest in Wheeling.

Recently, Mr. Anton Reymann, who takes quite an interest in the weather service, said to Mr. Schnepf that in the event of the government officials being persuaded that Wheeling ought to have its own observatory and corps of signal officers, he would give, without cost, a site for the observatory on the summit of Reymann hill, which is located back of the brewery, and on which is located Mr. Reymann's summer home. In addition, he said he would bear a portion of the expense of erecting the observatory building.

Mr. Schnepf carries this generous proposition to Washington, where he will lay it before the proper officials, and also seek the aid of the West Virginia congressmen in having Wheeling made a weather station. It is said there is some doubt of his success on account of the lack of funds in the signal service bureau. However, the effort will be made, and may result in success later if not in the immediate future.

The stations near Wheeling are located at Pittsburgh and Parkersburg. At Pittsburgh there are four men on duty, and two at Parkersburg. The advantage of having weather predictions made up from data secured by an observer right on the spot is considerable, and would result in more accurate forecasts for Wheeling and surrounding towns.

THE RAILROADS.

The savings feature of the Baltimore & Ohio relief department makes a good showing for the past year. The department has attracted considerable attention, and many of the employees are adding to their worldly goods by putting away such amounts as they can. The annual report makes the following showing for the past year:

Assets—Outstanding loans, \$725,596 31; printing press, \$1,183 86; investments, \$48,500; cash, \$146,734 66; miscellaneous, \$189 43; total, \$922,234 14. Liabilities—Due depositors, \$850,472 85; relief fund, \$1,898 80; profit and loss, \$25,764 06; miscellaneous, \$359 51; unpaid checks, \$2,808 92; total, \$922,234 14.

The deposits during the year have been \$240,775 07; the total deposits have been \$2,573,679 57; the amount loaned during the year has been \$192,591 85; the total amount loaned to borrowers has been \$2,680,437 85.

The amount loaned to employees has been expended in building 955 houses, buying 965 houses, improving 216 houses already owned, and releasing liens on 477 houses.

The committee takes pleasure in announcing that the prosperous condition of the savings feature of the department has been such as to allow them to declare 1 1/2 per cent extra dividend to all depositors in that feature having accounts drawing interest at the close of the fiscal year ending June 30, 1897, making interest on all such accounts equal to 5 1/2 per cent per annum.

PENNSY PREPARING.

The Pennsylvania company is evidently preparing for a struggle of some kind if indications go for anything. Retrenchment in operation is the watchword over all its lines. This is being carried out on the Pan Handle to a marked degree. Commencing last night, and to continue hereafter, Pan Handle No. 6 comes into Pittsburgh solid. The sections from Indianapolis and St. Louis joined at Columbus, O. When the train reached Union station last night it consisted of thirteen cars and was hauled by two locomotives. By this move the Pan Handle gets rid of the expense of one full train crew.—Pittsburgh Leader.

EAST BOUND SHIPMENTS.

East bound Chicago freight shipments for last week amounted to 69,736 tons against 53,363 tons last week and 69,539 a year ago, divided among the different roads as follows: Michigan Central, 7,800 tons; Wabash, 3,497 tons; Lake Shore & Michigan Southern, 9,835; Pittsburgh, Fort Wayne & Chicago, 10,250; Pittsburgh, Cincinnati, Chicago & St. Louis, 9,174; Baltimore & Ohio, 2,594; Chicago & St. Louis, 6,900; Chicago & Erie, 8,576; Cleveland, Cincinnati, Chicago & St. Louis, 1,573.

NEW CLEVELAND STATION.

The new station of the Baltimore & Ohio under construction at the foot of Water street, in Cleveland, will be completed about May 1. Three roads, the C, T. & V., the Baltimore & Ohio and the Cleveland, Lorain & Wheeling, will use the new station as a terminal.

SPECIAL BUSINESS.

The special business of the Baltimore & Ohio for the month of January included forty-seven parties with a total of 1,321 people.

GIVING AN IDEA

Some idea of the attention that the Baltimore & Ohio is now paying to its passenger traffic may be gained from the fact that during the past eighteen months nearly 800 passenger cars received thorough and ordinary repairs, 696 being repainted. Nearly all of the equipment is now Royal Blue and most of it is equipped with Pintsch gas, this light being used on local as well as through trains.

Destructive New York Fire.

NEW YORK, Jan. 30.—The cardboard factory of S. Trier & Son, Brooklyn, which caught fire early this morning, was totally destroyed. In the same building Samuel Schneidman had a knitting goods mill and the Schneidman Bros. a cut glass factory. The firm of Trier & Son had machinery valued at \$100,000, all of which was destroyed. Their total loss is placed at more than \$100,000. The losses of Schneidman and Schneidman Bros., whose plants were also completely destroyed, could not be ascertained.

PEOPLE who live in the country should keep Salvation Oil, the infallible antidote for the poisonous stings of bees and wasps.

AMUSEMENTS.

Mrs. Rosa Linde, the great American contralto, for three seasons the star of Mapleson's opera company in its palmy days, is to appear with Innes and his famous band in this city. She became most agreeably known to what New York critics, in that ludicrous hauteur and assumed superiority, are pleased to call "the provinces," meaning every part of the United States not within the bounds of the metropolis, through her association with the Linde-Nordica Company. The only objection the public had to that organization was the extraordinary value it placed on seats. Innes will not permit any such nonsense in connection with his concert. Mrs. Linde is undoubtedly the first dramatic contralto of America, having the most phenomenal and perfect voice since the great Alboni. Its range is three octaves, every tone pure, clear and beautiful. Madame Linde has done no little in achieving success as a singer of marked ability. The fact that she has, by marriage, become a daughter of Tennessee, should borrow additional local enthusiasm in that state and vicinity just as the knowledge that she is a Pittsburgh girl, educated by American masters, and recognized both in this country and Europe as the best American product of the kind, assures her a warm welcome in Pittsburgh and adjoining cities. Innes' band will be at the Opera House next Thursday, February 3rd, matinee and night.

EUGENIE BLAIR.

The great emotional actress, Eugenie Blair, will be the attraction at the Opera House next Saturday afternoon and evening, presenting, probably, "The New Magdalen" and "Camille." Says the New Orleans Times-Democrat:

One of the largest audiences seen in the Academy of Music since the beginning of the stock company season assembled to witness Eugenie Blair's interpretation of "Camille." The play is so well known that any comment upon it would be wholly unnecessary. Some people like it and others look upon it as particularly unwholesome, but one thing was evident, and that was that it had not lost its power to attract and deeply interest a large audience in New Orleans. Eugenie Blair's impersonation of the title role was artistic and forceful. Her pathos has a quality of genuineness that was convincing and contagious, and in her lighter moods she was full of playful comedy, always vivacious and taking. The scene with the elder Duval, and afterward with Armand in the third act, was a particularly strong and deeply pathetic one. She was repeatedly called before the curtain to bow her acknowledgments.

OLE OLSON HERE.

That this is a progressive age is clearly demonstrated by the enormous success that has awarded the sensational bicycle race in "Ole Olson" this season. To have a number of bicycle cracks ride at full speed several miles in full view of the audience may appear incredible. Yet such is the actual truth. By an ingenious patented mechanical device the riders never leave the stage and yet ride at record-breaking pace. At the Grand the first half of the week. A feature Monday night will be the bicycle race between Jess McCauley and "The Terrible Swede."

MRS. W. H. LESTER DEAD.

Wife of the Well Known Presbyterian Divine Died Saturday.

On Saturday occurred the death of Mrs. W. H. Lester, of West Alexander, wife of the well known Presbyterian divine, who has preached in Wheeling pulpits many times. Mrs. Lester was prominent and active in woman's work in the Washington presbytery, and she was liked and respected by a large circle of friends. She was a graduate of Mount Holyoke seminary, where that institution of learning was under the direction of Mary Lyon. Soon after this she married Mr. Lester and came with him to West Alexander, which was his first and has been his only pastoral charge. She was a woman of great Christian devotion, whose work in the church was highly valued, even though she was handicapped by being a lame invalid. She leaves a daughter, Miss Bessie, and two sons, the Rev. W. H. Lester, Jr., pastor of the Presbyterian church of Greenville, Tenn., and Nathaniel Lester, of West Alexander. The funeral occurs at West Alexander on Tuesday at 3 p. m. A number of Wheeling people will go out on the 1:15 Baltimore & Ohio train, returning at 6:20 p. m.

The Storms Gang Under Arrest.

BURLINGTON, Iowa, Jan. 30.—Six members of what is known as the Storms gang are now under arrest, charged with complicity in the murder of Mrs. Rathburn and her daughter. Blood stains were found on the clothing of Storms, the leader. A lad named Peterson to-day told the police he called at the home of the Rathburs several weeks ago and found two men there. One of them, he said, asked Mary Rathburn to fix his tie, and the boy afterwards identified the tie found on the body of Mary Rathburn as the one that had been called to his attention that night. The supposition is that the girl tore the tie from her assailant in the struggle for her life. Young Peterson also picked out the man Storms from a number of prisoners, and declared he was the man who wore the tie on the night he called at the Rathburn home. The police also say they have information that threats were made by members of the Storms gang against the Rathburs.

Free Delivery Statistics.

WASHINGTON, D. C., Jan. 30.—A table has been prepared by Chief Machen, of the free delivery division of the post-office department, comparing the cost of the free delivery service at fifty of the largest postoffices for the fiscal year 1896-7 with that for the fiscal year 1896-1. It shows that the percentage of increase in the cost of the free delivery during the six years covered by the table has been 24.6 per cent, while the population has increased 35.62 per cent, and the gross receipts have increased 25.48 per cent.

Woman Found Frozen to Death.

TROY, N. Y., Jan. 30.—The body of Mrs. George Connell, thirty-seven years of age, was found early this morning on the road leading over Mount Olympus. She had been frozen to death. It is thought that the woman had been drinking late night, became dazed and fell into an old lime pit. She must have crawled out of it, and being too weak to go farther, lay down in the middle of the road, where her body was found.

WEEKLY OIL REVIEW.

Only a few changes mark the course of events in the fields of oil during the past week, and these are not of particular significance, although the bear element of the trade made the best of them to depress the value and the situation in general, says the Leader review of oil.

Perhaps the most noted change in developments is the recent strike on Whiskey Run, in Ritchie county, which came in Wednesday afternoon. The late producer of which such an ado has been made, is located in the Albrecht farm and is owned by Theodore Barnsdall and Mallory Bros. The wild rumors were set in circulation as to the new venture's production, and for a time gained some credence. Upon inquiry of several prominent producers (one or two of whom are interested in the locality) what they knew about the new strike, all said they had direct and authentic information from the well and it was making thirty-five barrels an hour. The writer being familiar with this territory and its past development took these reports with lots of salt, believing that if Whiskey Run had yielded a producer of this caliber it certainly was most extraordinary. Later the size of the well dwindled down to 250 barrels a day, then to 150 barrels. The reports said the oil was found in the Big Injun formation, and that Whiskey Run was destined to be the Klondike of the great southwest.

The writer telegraphed a trusted scout in the Whiskey Run district who had been on the scene, for information concerning the new find, and here is what he said:

"The Barnsdall and Mallory Bros.' well, located on the Albrecht farm, Whiskey Run, has been erroneously reported, and its present condition will make perhaps from 75 barrels to 100 barrels a day. The oil was found in the Keener sand, but some claim it is from the Big Injun."

The oil certainly resembles that found in the other Keener sand wells in this district, and why the claim should be made that it is Big Injun is not accounted for.

From the indications of the Albrecht well there is considerable interest manifested, and as a result several locations have been made, but owing to the almost impassable condition of the roads it will be some time before machinery and supplies can be gotten into the field.

Since the Elk Fork Oil and Gas Company have gained their suit for the present, it is most likely that they will commence an active campaign in the pool on the Johnson leases, which embrace 20,000 or 25,000 acres of territory. But at best their operations will be slow, owing to the bad roads, which affect the transporting of lumber and machinery. The victory gained by the Elk Fork people seems to meet the general approval of the trade. Perhaps there was never litigation involving the right to oil lands in the southwest that has attracted so much interest. The case, however, has been appealed to the higher courts, and some time will elapse before the controversy is settled.

The Elk Fork field has remained rather passive for some time, and nothing has occurred out of the ordinary. With the past week or so one or two dust-ers have been completed, while the wells that were found were by no means gushers. The Hill Oil Company have started their No. 15 on the Hill, which is considered quite an important test, as it is located in the southwest end of the farm, and is considered clearly out of the line of defined territory. This company are pushing work as fast as possible at their Nos. 13 and 14 Hill, but it will be some time before the pay is reached.

While Elk Fork has presented many sensations in the way of gushers when least expected, it has also in the past week surprised the local talent by a rank duster, when it was thought failure was impossible. This surprise was Henry & McDonald's No. 2 W. V. G. well, located in purely defined territory, and only 400 feet south of the Fearless Oil Company's good producer on the Ag-see road. The well, the part of the pool the pay is found near the end of the sand, perhaps eight or nine feet in, while the wells in the northern part of the field are found anywhere from fourteen to twenty-five feet in the sand. When the owners failed to find oil in the top of the rock they were not the least dismayed, but felt certain they would find a rich pay when the drill reached the level of the pay in the wells in the northern part of the field, but it was a dust road from start to finish. This result has unquestionably put a quietus on further hunts to the south.

The South Penn Oil Company were again among the prize winners during the week in Monongalia county, West Virginia. Near the source of Flat run they tapped the first pay in No. 2 S. J. Harvy, and the well responded at the rate of twenty barrels an hour. Further operations were suspended during the removal of the boiler out of the way, and at this writing the drill has not been sent deeper into the rock, so the full result of this strike cannot be reported. This new strike is located some distance to the east of other developments, and for this reason it is considered of importance.

Of a recent date, however, the deep sand region of the Mountain state has not presented the most glowing aspect. The failures that have come to light in the past week have lowered the sails set by the gushers some time ago. The disappointment to the owners of these costly ventures is hard to bear and will have a tendency to chill their ardor in the Gordon sand.

Perhaps one of the most important test wells completed in this formation for some time past and which has also condemned quite a large amount of territory, was finished by the South Penn Oil Company at the beginning of the week. This venture is located on Piney Fork, Wetzel county, to the northwest of the deep sanders in this county, and situated on the J. Brash farm. It was the driest duster found in the state for many months. In their wildest exploration in the same formation they met with failure on the W. G. Snodgrass farm, some distance east from the noted Mills tract. In Wetzel county the same company ran up against another duster on the H. I. Smith farm, in the Big Sandy district. On Campbell's run, Marion county, the South Penn people found a 150-barrel well on J. A. Arnett's farm.

A BIG OIL DEAL.

LIMA, Ohio, Jan. 30.—The Mount Zion Oil Company, of this city, has sold to Cleveland capitalists, headed by D. P. Sherbondy, all of its property in Wells county, Indiana, consisting of 623 acres of land, all but 100 of which is developed; forty-seven wells with a production of about 350 barrels per day. The purchase price was in the neighborhood of \$110,000.

DURING the past two years, Mrs. J. W. Alexander, wife of the editor of the Waynesboro (Miss.) Times, has, in a great many instances, relieved her baby when in the first stages of croup, by giving it Chamberlain's Cough Remedy. She looks upon this remedy as a household necessity and believes that no better medicine has ever been put in bottles. There are many thousands of mothers in this broad land, who are of the same opinion. It is the only remedy that can always be depended upon as a preventive and cure for croup. The 25 and 50 cent bottles are for sale by druggists.

Relief in Six Hours.

Distressing Kidney and Bladder disease relieved in six hours by "New York" American Kidney Cure. It is a great surprise on account of its exceeding promptness in relieving pain in bladder, kidneys and back, in male or female. Relieves retention almost immediately. If you want quick relief and cure, this is the remedy. Sold by R. H. List, Druggist, Wheeling, W. Va.

RUSSIA'S DIPLOMACY

Forces China to Terms—Japan's Attitude is More Friendly.

LONDON, Jan. 30.—The Daily Mail this morning says it learns from a source "hitherto accurate" that China is inclined to make the best possible bargain with Russia, whose diplomacy appears to have triumphed at Peking, England having resolved not to force a conflict by further opposing Russia's claims at Port Arthur and in the Liao-Tung peninsula. Japan, says the Daily Mail's authority, "has been thrown into a state of consternation by the British back-down, and has adopted a more friendly attitude toward Russia."

This statement, however, the Daily Mail admits, is "incredible and probably a bluff with a view of forcing England to take decided steps."

The Daily Mail counsels its readers not to be alarmed.

RUSSIA'S WARNING

To China in Case Kiao Chou was Granted To Germany.

LONDON, Jan. 30.—A dispatch to the Daily Mail from Shanghai says a secret decree has been issued by the Tsung Li Yamen to certain high officials informing them that Russia warned China that if Kiao Chou were granted to Germany Russia would demand either Ta Lien Wan or Port Arthur.

According to the same dispatch it is asserted at Shanghai on good authority that China consents to have Russians at the head of her customs and railways.

At the present moment, says the Daily Mail's correspondent, there are 10,000 Russian troops in Ta Lien Wan and Port Arthur. Russian agents have been sent to Tien Tsin (the port of Peking) and to Japan to purchase coal and food, and 60,000 bags of wheat have been bought at Tien Tsin.

Killed by the Cars.

NEWTON, Mass., Jan. 30.—Miss Mary Ellen Walsh and Miss Bridget Murphy, both domestics, were killed by a train here last night while walking on the track.

One of the barges lost by the steamer Ark, at Belaire, is reported as a dangerous obstruction. It is lying about 200 yards above the Pittsburgh coal works, about one-third of the width of the river from the West Virginia shore. Pilots going down the river are warned to keep to the right of the obstruction.

A NEW WHARFBOAT.

CINCINNATI, Jan. 30.—The Pittsburgh & Cincinnati packet line is preparing specifications for a new wharfboat, and, as soon as they are completed, will ask for bids for the construction of the new craft. The wharfboat will be 230 feet long, will have two hulls each 20 feet wide and separated 16 feet, so that the total width, or width over all, will be 56 feet. The structure is to have a cargo box similar to that on other wharfboats, and will be fitted up with an office which the company will use exclusively at this end of the line. No expense will be spared to make it complete and convenient in every detail. It is expected that the contract will be let for it before many weeks, and that the wharfboat will be ready for use by the middle of May.

River Telegrams.

MORGANTOWN—River 8 feet 10 inches and falling. Clear and cold.
GREENSBORO—River 8 feet and falling. Cold and fair. James G. Blaine and Nellie Hudson down Monday; Germania up.

STEUBENVILLE—River 12 feet 6 inches and falling. Clear and cold. Passed up: Ben Hur, Keystone State, Kanawha, Clifton. Passed down: Pacific, Hornet No. 2, Relier and Cruiser.

WARREN—River 2 feet 9 inches, clear and cold.

OIL CITY—River 3 feet 10 inches and falling. Weather clear and cold.

BROWNSVILLE—River 7 feet and falling.

PITTSBURGH—River 9.2 feet and stationary at the dam. Clear and cold.

PARKERSBURG—Ohio river 20 feet 10 inches and falling. Snowing; mercury 31. Dred down: Virginia. Passed down with coal: Raymond Horner. Passed down and up: Argand, Little Kanawha falling. All locals on time.

How a person can gain a pound a day by taking an ounce of Scott's Emulsion is hard to explain, but it certainly happens.

It seems to start the digestive machinery working properly. You obtain a greater benefit from your food.

The oil being predigested, and combined with the hypophosphites, makes a food tonic of wonderful flesh-forming power.

All physicians know this to be a fact.
